

Senior Design Engineer

- **Adelaide based role**
- **Industrial Water Treatment**
- **Dynamic company**

Desalination and water recycling is an industry of the future. Osmoflo Pty Ltd is the leading Australian owned manufacturer of water desalination and water recycling equipment. Osmoflo has an excellent reputation in the market for quality, innovation and flexibility. It is well known in the industry for its commitment to customer service and use of state of the art technology.

As the result of business growth, we are seeking to appoint an experienced Design Engineer to join our Sales Proposals team. This role will have responsibilities in the following areas:

- Concept design of industrial water treatment plants
- Providing technical advice and support to sales staff
- Assist in the preparation of tender documents and proposals

To be considered for this key opportunity, candidates should have a degree in Chemical Engineering and have extensive work experience in a similar role in the design of industrial or municipal water treatment. Experience in desalination and microfiltration will be highly regarded. A self starter, you will have a high degree of self-management and be experienced in providing technical leadership and direction to junior staff. A confident communicator you will be comfortable supporting sales staff in technical presentations and have excellent written communication skills.

We believe this role represents an exciting career opportunity for experienced water professionals to be a key player in a dynamic and growing company. Assistance with relocation to Adelaide will be provided. Applications quoting AS100227 in the subject line should be forwarded to:
